Projects

PigDice, Lead Developer, June 2017
Github: https://github.com/EricWanjohi/pigDice
This web application allows two players to play a game of pig dice.
- I created the user interface of the program to enable the user to navigate easily on the web application and give a good appearance to the page.
- I implemented javascript language constructs to handle application functionalities on the fly using scripts.

Ping Pong, Lead Developer, June 2017
Github: https://github.com/EricWanjohi/Ping
The program allows a user to enter a number and display strings for numbers divisible by 5 and 3.

- I created the UI (user interface) applying Html5 and CSS3 concepts.
- I implemented Javascript constructs in adding functionalities of data collection and manipulation for the application to function as intended according to the use cases and objectives laid out.
